

## Testimonials about our products:

Dear Ken,

I wanted to drop you a note and thank you for your participation in the development and manufacturing of our "BAG-R-BOX Saddlebag Insert Trays" product. I found working with you very pleasant, informative and worthwhile. I also appreciate the professional manner by which you and your staff conduct business. The product has turned out just as I had envisioned it, when we first began discussing my idea. We're very pleased with the outcome. The manufacturing process went smoothly and I have found no defects in material or workmanship amongst my inventory.

I look forward to working with you again soon.

Michael Tipps  
CEO

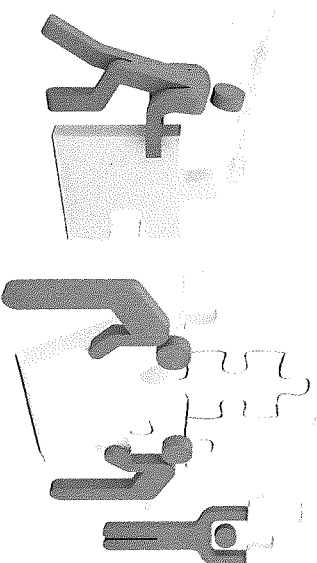

Dear Ken,

Simply stated, because of Shape Master, we now have a beautiful building which is as close to its original restoration as we could determine. The ceiling was so severely damaged that we were concerned that it could never be repaired. This was well worth the cost and the result speaks for itself. There is simply no other way that we could find to accomplish this without you and the talent at your company. The building prior to this project had a suspended ceiling just under 8 feet high and the upper window sections could not be seen from the inside and on the outside they were simply covered in plywood and painted.

On behalf of everyone at TRICOR Insurance;  
Thank you.

*Forming solutions in...  
Plastic!*

We competitively manufacture here in the Midwest U.S.A. so we can control quality and delivery. ShapoeMaster uses only materials provided by U.S. vendors and workers. We are a proud U.S. manufacturer, not a parts broker.
